# Annual Financial Performance

Amount In Rs. Cr

- Total sales increased 38% YoY, primarily driven by increase in NPK volumes and enhanced trading volumes of solvents
- Increase in raw material costs, especially natural gas and propylene, Increase in forex loss and Increase in interest charge due to capitalization of NPK plant and Chemicals Trading working capital resulted in flat profitability

# Debt Profile

## Management Commentary

- Net debt increased by Rs 1,280 Crore during the year. Increase is mainly due to working capital borrowings for increased chemicals trading
- The company will continue to do strategic trading in solvents however opportunistic trading will be reduced in coming quarters to reduce the working capital borrowings
- Increase in debt is also on account of increase in sales from new NPK capacity, and other projects & routine capex
